Description			
We have made some progress on a plan for projects based funding for PPI. We require assistance to form a working group composed of members inside and outside PPI. We require a working group to start applications for funding our two conferences, PSC and TT, plus any other projects that we would like to promote. In addition, we will have to form a separate private fundraising unit that will focus on donations from Geneva that can be tax exempt once we succeed in registering as an NGO there.
